2014:
- 18,300 new cases of bladder cancer in women
- 4,410 women die from bladder cancer

145,796 Women in the U.S. are bladder cancer survivors

What increases your risk?
- Smoking
- Early Age at Menopause
- History of UTIs
- Not Drinking Enough Water

5 year Survival % for Bladder Cancer Stages
- In Situ: 96.4%
- Localized: 62.4%
- Regional: 27.8%
- Distant: 4.8%

Early Diagnosis is Key!

Symptoms of Bladder Cancer
- Blood in the urine (hematuria)
- Frequent and/or Painful Urination
- Urine is dark yellow, bright red, or cola colored
- Back and/or Pelvic Pain

*Bladder cancer symptoms may be identical to those of a urinary tract or bladder infection and other conditions.

Even if symptoms disappear, make sure your doctor rules out bladder cancer.
